

ASSET IMPROVEMENT MAPPING

The Asset Improvement Mapping (AIM) evaluates a site's asset performance management (APM) maturity and improvement potential in four to six weeks (min.). The AIM is the first step in optimizing asset performance resulting in more production, reduced Total Cost of Ownership and improved Overall Equipment Effectiveness in the long-term. MaxGrip has completed over 158 AIMs worldwide.

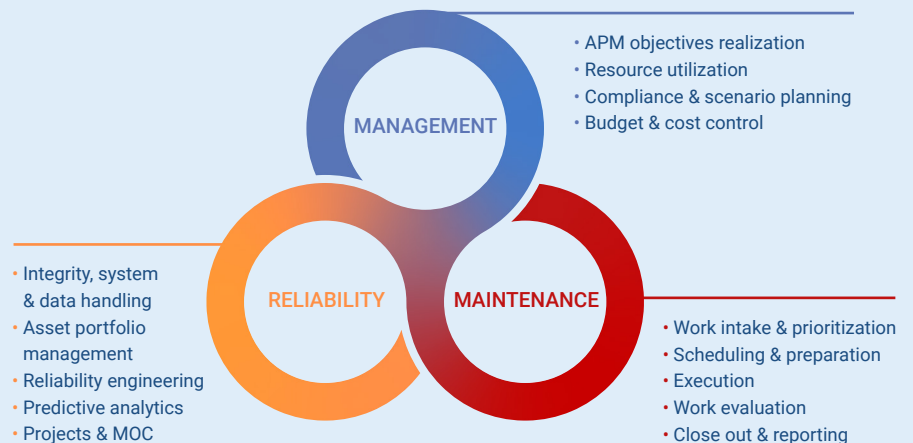

A pragmatic roadmap in six steps

HOLISTIC ASSESSMENT

We use a framework that connects the dots between maintenance execution, asset reliability and management.

MaxGrip consultants assess those three APM cycles across five areas which empower an organization to perform: culture & way of working, roles & responsibilities, processes, systems & tools and data.

Client success story

Multiple million pounds savings for Victrex

The AIM for Victrex was based on 35 stakeholder interviews, a remote plant walkdown, performance reports, data analyses and other information. MaxGrip engaged with the core team to achieve full alignment, present findings and a pragmatic roadmap to key stakeholders. Victrex is deploying the roadmap with focus on the long term.

First results include:

- Sustainable performance improvement with high projected cost savings;
- The AIM and deployment serve as a blueprint for global scale up;
- High staff engagement due to Victrex taking ownership in an early stage and dedicated attention for change management;

"The assessments, improvement roadmaps and implementation in the workstreams are proving successful and I see the clear acceptance and adoption by my staff, taking ownership."

Jeff Versterre, COO of Victrex

ABOUT MAXGRIP

MaxGrip is specialized in Asset Performance Management (APM). Our trusted advisors help market leaders in industries like Manufacturing, FMCG, Pharmaceuticals, Power, Oil & Gas and Water improve their asset performance. MaxGrip was founded in 1997 and operates globally with offices in the Netherlands (Utrecht), USA (Houston) and Malaysia (Kuala Lumpur). Find out more on maxgrip.com or contact us **by email**.
